ESP SUPPLEMENTS

BODY-CLEANSING FORMULA

Annona Muricata (Graviola), an herb, supports healthy cell growth and function, helps to maintain a good intestinal environment, has a calming effect on the whole body, lowers blood pressure, contains serotonin, and helps to support the immune system. What makes graviola so unique is its wide variety of bioactive phytonutrients which work naturally to enhance immune function at the cellular and systemic levels.

Andrographis paniculata (Bloodroot), an herb, an immune stimulant; a natural antibiotic; protects against cancer, intestinal infections, hepatitis, pneumonia, infections, heart disease, worm infestation, bacterial, viral, and parasitic conditions; dispels heat associated with fever or infections; protects the large intestine, lungs, stomach, bladder, liver meridians or energy pathways in the body. *Azadirachta indica (Neem)*, an herb, used to purify blood, to cleanse the liver; aids in healing a variety of skin irritations and inflammations; supports the immune system; supports healthy blood glucose levels, reduces tumors and cancers; protects against heart diseases, blood clots, rapid heart beat, blood disorders, including poor circulation, blood poisoning, and kidney problems; aids in digestive disorders, including indigestion, ulcers, and gastritis; aids in anxiety, epilepsy, and hives.

Larrea Tridentata (Chaparral), an herb, native to the Southwestern United States. The principal ingredient in Chaparral is nordihydroguaiaretic acid (NDGA), an anticancer agent and a potent antioxidant. This herb also has anti-inflammatory, antibacterial, anti-fungal, analgesic, emetic, expectorant, and diuretic properties. Chaparral removes heavy metals from the body and offers protection against the harmful effects of radiation, the formation of tumors, and cancer cells. It is beneficial for urinary infections, ear infections, skin irritations, and gingivitis. Externally it can be used for rashes, wounds, eczema, acne, any type of dermatitis.

Indole3Carbinol, a naturally occurring phytochemical found in cruciferous vegetables, such as cabbage, broccoli, cauliflower, and kale. It is a powerful antioxidant, helping to prevent cellular damage caused by free radicals. It is also known to support the liver's detoxification processes as well as normal cellular reproduction. It inherently contains sulfur, an element that is present in every cell. It is responsible for the lowered risk of cancer and studies have shown it to dramatically reduce the frequency, size, and number of tumors.

Directions: 1/2 dropper directly in the mouth 1-4 times daily on an empty stomach, depending on the severity of the ailment. This formula can also be put in the ears: 1/2 dropper 1-2 times a day.
